

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A plasma display panel comprising:
a first dielectric layer having a substantially rectangular shape for covering a display electrode which is formed on a front substrate and which includes a scan electrode and a sustain electrode; and
a second dielectric layer having a substantially rectangular shape for covering a data electrode formed on a back substrate, wherein
at least one of the first dielectric layer and the second dielectric layer in plane view has a ~~corner~~ four corners with a radius of curvature of other than zero, and each of the four corners is where two sides of the substantially rectangular shape meet.

2. (Currently Amended) The plasma display panel according to claim 1, wherein at least one of the first dielectric layer and the second dielectric layer is formed by firing a precursor material layer transferred from a transfer film, the precursor material layer has a substantially rectangular shape, and four corners of the substantially rectangular shaped precursor material layer are rounded.

3. (Currently Amended) The plasma display panel according to claim 1 ~~or~~ 2, wherein at least one of the first dielectric layer and the second dielectric layer is formed by firing a precursor material layer having photosensitivity, the precursor material layer has a substantially

Application No.: 10/507,312

rectangular shape, and four corners of the substantially rectangular shaped precursor material layer are rounded.

4-10. (Cancelled)
